

Practical-5

- A producer-consumer program was created using an anonymous pipe.
- The parent process acted as the producer and generated the values 10, 20, 30, 40 and 50.
- The child process acted as the consumer and successfully received the same values through the pipe.
- The program measured the communication time using clock().
- The output showed that the data produced by the parent was successfully consumed by the child process.
- The communication time displayed in the executed output was 0.000104 seconds for the producer and 0.000201 seconds for the consumer.

Screenshot of the Output

```
shravya@Shravya:~$ nano producer.c
shravya@Shravya:~$ gcc producer.c
shravya@Shravya:~$ ./a.out
producer
produced 10
produced 20
produced 30
produced 40
produced 50
time taken is 0.000104
consumer
Consumed 10
Consumed 20
Consumed 30
Consumed 40
Consumed 50
time taken is 0.000201
shravya@Shravya:~$ |
